the apprentice
doctor

DR ANTON SCHEEPERS

HOW TO MAKE THE MOST OF THIS RESOURCE:

Judging by the numerous questions on Internet pre-medical forums regarding requirements for admission to medical school, a "to the point" guideline/workbook has long been overdue!

Long gone are the days where one could secure a place in medical school by simply applying, even with your excellent academic results, as the sole evidence offered to the admission officers or selection committee. Due to the highly competitive arena and the number of excellent students who want to study medicine, one needs to impress the committee with a lot more complimentary activities, studies and, if at all possible, research. In addition to showcasing your academic excellence, illustrate that you are a well-balanced individual with leadership characteristics.

Plan your complimentary activities well. Also, ensure that your planned extracurricular activities are in line with your vision and with the goals that you have set for your life.

Starting with your early high school age, log all relevant activities carefully. Include the relevant details, dates and — importantly — signatures and contact information for your various teachers, mentors and medical professionals.

Although there are no specific number of hours for each subcategory, we recommend that you aim for a total of not less than 200 hours. There is no maximum. However, attempt to maintain a fair spread between all the various types of extracurricular activities (courses, volunteering, shadowing, clubs, charity, trips, cultural, art, sport etc.)

Your story (what inspired you to choose medicine as a career) is more important than your number of hours. A smaller number of well-suited hours (caring for a terminally ill patient, for example) is better compared to a large number of irrelevant hours (e.g., being a documents courier at a hospital). Tell your story at the "Personal Statement" section.

Keeping a healthy balance in your life is more important than having thousands of hours that illustrate what you have done at the expense of your physical, mental health or spiritual well-being.

There might be some overlap in the various categories. If so, use the most appropriate category to fit your situation.

At the end of the day you want to impress the university / medical school admission officers / selection committee. With that in mind, write your own life story with the intention of showing that you are serious about becoming a great medical professional.

Excelling in academics is still your primary motive — with special reference to mathematics and science (physical science, chemistry and life sciences/biology).

During the medical school years, one needs to absorb an immense amount of information. In this regard, a good 'study methodology' and a 'memory expansion course' are virtually essential for success; [Contact Us](#) for more information.

Goal setting is important! If you need a great goal-setting tool, the Apprentice Doctor® offers a very useful E-Book on goal-setting for aspiring medical professionals. This is available [from our website](#).

You do not need to make a final decision at your high school or premed stage on the specific specialty field (e.g., anesthetics or dermatology, for instance) that you intend pursuing. In any event, you will first need to become a general doctor. During your years in medical school you will be exposed to all of the various medical disciplines. This will provide you with more than enough time to gravitate to the field within medicine that interests you and suits you the most. Download your free E-book "Which Branch of Medicine is for You?" [\[Click Here\]](#)

Stay focused, be tenacious and persistent: In other words, **NEVER GIVE UP!**

THIS BOOK IS DEDICATED TO:

List the names of persons who inspired you to follow medicine as a career and those who made your journey possible up to this point in time.

Number	Name	Role (e.g., parent, teacher, mentor, etc.)	More information about the person and the reason for listing them

ABOUT THIS ACTIVITY LOGBOOK

*A handy resource and guide for preparing an impressive résumé (C.V.)
for applying to university for pre-medical training and/or to medical school*

- ✓ Logging all your preparatory activities related to your prospective medical career
- ✓ Guidelines on how to prepare your application
- ✓ Guidelines on how to prepare for your Interview
- ✓ The ultimate way to log and organize all your medical and related activities
- ✓ A list of handy resources to assist with your dream of becoming a great medical professional
- ✓ Impress the Admission / Selection Committee with a well organized application

COURSES

List of courses (including online and distance learning courses) that you have completed and/or attended related to your envisaged career:
(e.g., Apprentice Doctor Course / Camp / First Aid / AHA Basic Life Support / Other)

Number	Course	Details (Presenting institution, level etc.)	Date	Hours	Website/Reference	Course presenter Signature	Telephone number
Example	The Apprentice Doctor Premedical Camp 2015 at Tampa FL, USA	This was an incredible eye opener to me and I firmly renewed my commitment of becoming a doctor. We received a great amount of information, and gained useful medical skills like a hands-on practical on phlebotomy, Pulse Oximetry, How to Suture Wounds! See addendum 3 for a transcript of the program.	dd/mm/yyyy to dd/mm/yyyy	Total of 40 hours	www.TheApprenticeDoctor.com	A Scheepers	Apprentice Doctor - Office: 916-724-6415
